LABOUR UNDERUTILIZATION

The system of indicators

- time-related underemployment;
- unemployment;
- potential labour force;

Time-related underemployment

- are defined as all persons in employment who, during a short reference period, wanted to work additional hours, whose working time in all jobs was less than a specified hours threshold, and who were available to work additional hours given an opportunity for more work.

Unemployment

- all those of working age who were not in employment, carried out activities to seek employment during a specified recent period and were currently available to take up employment given a job opportunity

Potential Labour Force

persons who were neither in employment nor in unemployment in the reference week AND were:

- willing to have a paid job, but unavailable within 2 weeks after the reference week;
- willing and available to have a paid job, but carried out no activities to seek employment or set up a business.

Potential workforce determination

- There are questions for determining this in the Survey on (LFS)
- The question was raised about this in the Population Census.

Improvements in labor market indicators in Azerbaijan after implementation of new standards

After approval of new employment standard in the 20th International Labour Statistics Conference, it is planned to change the labour force survey questionnaire and its methodology
